

HARWICH PORT

HEATING & COOLING, LLC.

GENERATOR ANNUAL MAINTENANCE

\$295*

*Air cooled generators only

A generator is not a buy, and forget it until you need it. Instead, it requires annual maintenance, just like the other systems in your home, to ensure that it's ready to successfully fire up whenever you need it.

INCLUDES:

AIR/ OIL FILTERS

Inspect/Change air & Fuel filters & Spark plugs (at required hours), Change engine oil & oil filter, check exhaust system, lubricate fittings, Inspect governor linkage/oil level/controls

BATTERY CHECK

Check for correct voltage & frequency, battery level, operation of battery charger, flex connection and mountings, Inspect electronic connections

SIMULATED OUTAGE

Check auto start-stop mode, simulate a safety shutdown (on applicable units) and outage to check operation of ATS

CLEANING

Remove debris in/around unit & clean unit exterior, Repair minor leaks (ex. loose fittings)

Harwich Port Heating & Cooling (HPHC) employs experienced and certified technicians for Generac generators. This agreement has been prepared to provide an annual maintenance/service plan that ensures the installed equipment is maintained to the highest possible level of readiness in the event of an outage. HPHC utilizes OEM parts whenever possible as outlined by the manufacturer. Liquid Cooled generator maintenance is charged a time and material rate.
